

An Official statistics publication. Publication date: 7 September 2021

About this release

This release by NHS Education for Scotland (NES) provides a quarterly update, as at 30 June 2021, on the Child and Adolescent Mental Health Services (CAMHS) workforce staff in post and vacancies. Figures are presented as headcount (actual numbers of staff) and whole time equivalent (WTE), which adjusts the figures to take account of part time working.

Main Points

At 30 June 2021:

- There were 1,085.8 WTE staff in post within NHSScotland CAMHS, an increase of 66.1% since 2006, 9.3% since 31 March 2016, 0.4% since 30 June 2020 and an increase of 0.7% since 31 March 2021 census. This is an increase of 5.8% within the Psychology professional group and decrease of 0.7% within the Nursing professional group and 1.2% within the Medical professional group since last quarterly census. Of the total staff in post, 4.9% of staff were on maternity/paternity leave and 1.5% were on long term sick leave.
- There were 755.9 WTE (69.6%) CAMHS staff working in whole-time posts and 328.9 WTE (30.3%) working in part-time posts, an increase of 3% in whole-time posts and decrease of 5.2% in part-time posts since June 2020 census. Within the Medical professional group, 55.8% of staff worked part-time, compared to 42.7% in the Psychology professional group and 15.7% in the Nursing professional group.
- Of the total NHSScotland CAMHS workforce, 929.1 WTE (85.6%) were female staff and 155.7 WTE (14.3%) were male staff. This is a decrease of 4.3% of male staff and an increase of 1.9% of female staff since June 2020 census and an increase of 3.4% of male staff and 0.3% of female staff since March 2021 census.
- There were 126 WTE vacancies advertised of which 52.5% of vacancies were in the Psychology professional group and 25.6% of vacancies were in the Nursing professional group. The WTE of vacancies increased by 73.3% since last quarterly census. Of the total vacancies advertised, 79.4% were advertised for less than 3 months, 19.4% were advertised for 3- 6 months and 1.3% were advertised for more than 6 months.

- Of the total 126 WTE vacancies advertised, 50.1% were advertised as replacement posts, 39% were advertised as new posts, 3.8% were for maternity/paternity cover, 2.3% were for other/secondment posts and data was not provided for further 4.8% vacant posts. The total vacancy rate was 10.4% compared to 6.3% for the last quarterly census.

52.5%
in Psychology Group

25.6%
in Nursing Group

Background

Child and Adolescent Mental Health Services (CAMHS) provide essential assessment, care and treatment of children and young people (and their parents/carers) who are experiencing serious mental health problems. They also have an important role in supporting the mental health capability of the wider network of children's services. The delivery of good quality CAMHS services depends upon adequate numbers of staff being recruited and retained across NHSScotland.
