

An Official statistics publication. Publication date: 3 December 2024

About this release

This release by NHS Education for Scotland (NES) provides a quarterly update, as at 30 September 2024, on the Child and Adolescent Mental Health Services (CAMHS) workforce staff in post, vacancies and staff in training.

Figures are presented as headcount (actual numbers of staff) and whole time equivalent (WTE), which adjusts the figures to take account of part time working.

Main Points

At 30 September 2024:

- There were 1,490.2 WTE (1716 Headcount) staff in post within NHSScotland CAMHS, an increase of 128% since 2006, 50% since 31 March 2016, 8.6% since last year and decrease of 1.4% since last quarterly census. This is an increase of 9% within the Nursing professional group and 5.1% in the Psychology professional group and decrease of 1.4% in the Medical professional group since last year. Of the total staff in post, 51.6 WTE (3.5%) were on maternity/paternity leave and 25.3 WTE (1.7%) were on long term sick leave.
- There were 68.8% members of staff working in whole-time posts and 31.2% working in part-time posts, an increase of 4.5% in whole-time posts and 18.9% in part-time posts since last year's census. Within the Medical professional group, more than half (56%) of the workforce worked part-time, compared to 45.7% in the Psychology professional group and 17.8% in the Nursing professional group.
- There were 86.6 WTE vacancies advertised which is an increase of 1.9% vacancies since last year. 41.9% of vacancies were in the Psychology professional group, 39.1% of vacancies were in the Nursing professional group and 6.9% were in the Other professional group.
- Of the total vacancies advertised, 53% were advertised for less than 3 months, 20.8% were advertised for 3-6 months and 26.2% were advertised for more than 6 months.
- There were 19.8 WTE vacancies approved for recruitment but not yet advertised and 8.7 WTE vacancies were sent for approval but not yet approved.
- Of the total 86.6 WTE vacancies advertised, 78.9% were advertised as replacement posts, 17.9% were advertised as new posts and 3.2% were advertised as maternity/paternity cover. The total vacancy rate of 5.5% has increased compared to 4.6% for the last quarterly census and decreased compared to 5.8% for last year's census.

→ Compared to **5.8%** for last
year's census

Background

Child and Adolescent Mental Health Services (CAMHS) provide essential assessment, care and treatment of children and young people (and their parents/carers) who are experiencing serious mental health problems. They also have an important role in supporting the mental health capability of the wider network of children's services. The delivery of good quality CAMHS services depends upon adequate numbers of staff being recruited and retained across NHSScotland.

Information on members of staff employed are sourced from each NHS Health board and verified by CAMHS lead clinicians using the National CAMHS Workforce Information Database held centrally at NSS. NHS Education for Scotland work closely with these clinicians to ensure a high level of accuracy. Continuous work is undertaken to improve the data quality and consistency of the information provided. Previously published information may change to reflect any improvements. Further information is available on [Turas Data Intelligence](#).
